Case Study – Gibshill Children’s Centre

Amount Awarded: £1,000.00

“We were awarded £1,000 which we have used to enhance our outdoor learning space. Some of the grant has been spent on seeds for fruit and vegetables which will allow us to plant and grow our own healthy food.

In order for our children to experience the full cycle of planting, growing, and eating, we have also purchased a fire pit and cooking pots which the children have thoroughly enjoyed.

Our children are learning and experiencing skills for life, learning, and work. Groups of children have enjoyed harvesting our produce and then making soup and pasta sauce using the fire pit.

Our families have been involved in this initiative as we have prepared food packs and recipes for the children to take home and repeat the process in their family home.”

- Gibshill Children’s Centre (October 2021)
